ongoing activities and initiatives.

Global Network of Organic Resource Management
International Platform of Corporate Experience

an initiative by
100 – First Zero Waste & Organic Cycle Organisation [100NGO]

The vision

GlobNORM intends to serve as a global platform for organisations and experts active in prevention, separate collection and humus recycling of organic resources, including researchers, farmers, technology suppliers as well as governmental institutions and municipalities. The main purpose is to support the exchange of best practice and knowledge worldwide by means of education and training programs, supporting organic waste management policies, facilitating pilot projects.

Activities & Measures to start with ...

- **GlobNORM** database
 - Members organisation's directory: organics management & processing companies | associations | technology suppliers | consultancies | research institutes ...
 - Global legislative and standards data base on organic resource management
- Networking in project development and implementation
 - Pilot projects on food waste prevention | separate collection | biological treatment | humus management
- Education & training | study tours | conferences
- Developing and supporting an international Quality Management, Quality Assurance for compost and composting plants as well as digestate and biogas plants in cooperation with **Compost & Biogas Association Austria – KBVÖ**

With this we cordially invite all interested organisations and colleagues to join the global network to strengthen the efforts for our common vision of the organic cycle.

Member category	Annual fee
